All

Road Traffic Density

Type of Order

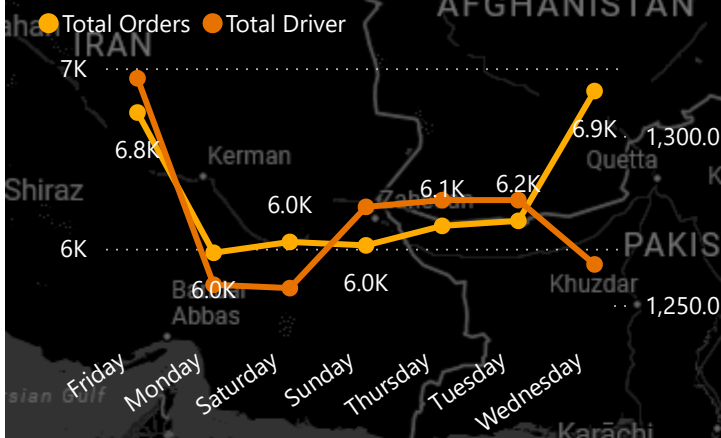

Insight:

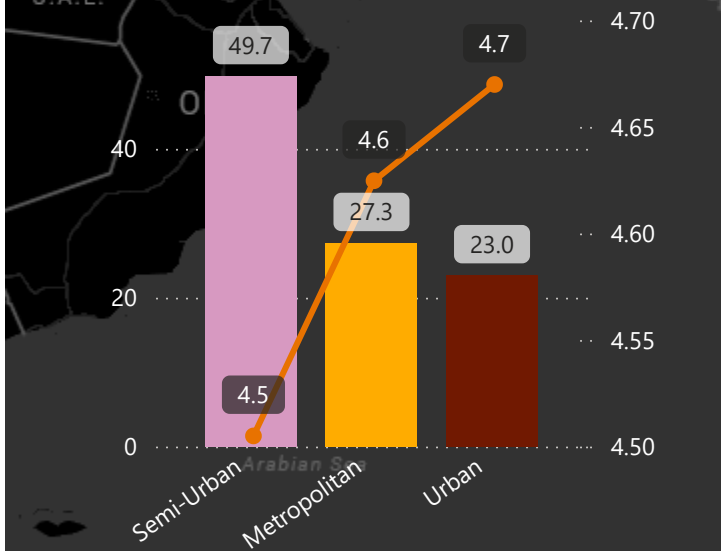

- Customer ratings tend to decline significantly when delivery time exceeds 30 minutes.
- High traffic density (Jam) has a major negative impact, drastically increasing average delivery times.

Zomato Regional Order Volume Density

Orders Daily Trend

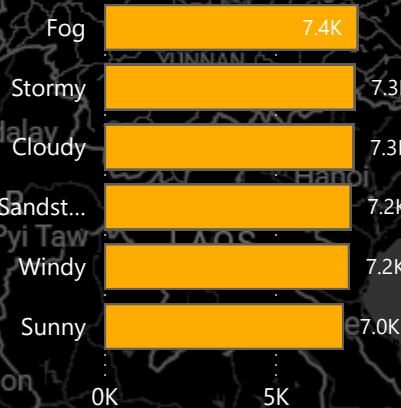

Avg. Delivery Time & Rating by Area

Select City:

All

Type of Weather

Insight:

- A significant drop in order volume occurred during Week 2, which conversely triggered a sharp increase in the Average Delivery Distance.
- Zomato's order distribution is heavily concentrated in Metropolitan areas (>20K orders), while Semi-Urban areas account for the lowest order density (<5K orders).

Region_Grade ● 1. High Volume (> 20K Orders) ● 2. Medium Volume (5K - 20K Orders) ● 3. Low Volume (< 5K Orders)
